You can feel it. Solid wood under your feet is a sensual pleasure. Pleasing to the eye, karmic to the soul and naturally warm to the touch. It adds authentic texture and design to any room. The reassuringly deep sound underfoot when you walk across the floor is just right, and even after the smell of cut wood has worn off, the air remains fresher. A Junckers floor lets you get on with your life exactly the way you wish because good design is as easy to live with as it is to look at. People thrive on solid wooden floors.
The floor links the architecture with the interior and sets the basic atmosphere in a room. All other design elements are influenced by it. Real quality and beauty in the floor will enhance the entire space, whereas inferior flooring creates a dull atmosphere that no furniture or interior style can make good.

I use Junckers solid hardwood floors to create spaces that are exceptional in the way they look, feel and sound. With my contemporary colours and surfaces, they successfully fuse the durable charm of solid, living wood with virtually unlimited design freedom for the customers. They are creative classics.

Combining your individual choice of selected hardwood, surface, finish and colour, the floor becomes a playful design element in its own right. In my experience, these floors can improve any interior space. Often they create magic.

Properly cared for a Junckers floor is likely to last a lifetime and more. Yet, in case your idea of style is a little more transient, you’ll be pleased to know that you can sand down and restyle your Junckers floor again and again. Real quality simply never goes out of fashion.

*Mads Arlien-Søborg*
“These floors represent something entirely new. They pick up on the growing demand for individual choice and expression. Here’s a floor that customers can design for themselves to support a design idea or completely transform an atmosphere. It is important to me that the natural wood is ever-present as well as the exclusive feel of a Junckers floor. It looks expensive and I don’t want to change that.”

Mads Arlien-Søborg is one of the most influential trend experts in Denmark and the creative mind behind Junckers Design Collection.
Our floors are made for life - real life -
to look beautiful through generations of daily use
There is no substitute for quality
This has been our premise since Junckers began producing solid hardwood floors some 80 years ago, and still is. Our floors are made for life - real life - to look beautiful through generations of daily use. The manufacturing techniques we employ have been refined through decades and are synonymous only with Junckers.

From raw material to finished floor, we carry out dozens of quality controls, and each of our finished floors bears the hallmarks of remarkable craftsmanship. To our customers this means extraordinary floor stability, unconstrained design freedom, excellent sound management options, flawless finishes, and last but not least, an investment that will add tangible and lasting value to any building.

Every flooring project, big or small, is important to us, and we continually evaluate our products and processes, in order to stay at the forefront of flooring solutions that meet the wide-ranging and varying demands of different building projects. We are always pleased to share our long experience and technical knowledge with our customers, from floor design to aftercare.

Since we were founded, we have supplied more than 100 million m² of solid wooden flooring to all corners of the world. Most of these floors are still in place, continuing to bring pleasure and satisfaction to their users. But above all, we are pleased to be part of the exceptional design in the homes and offices of people with a taste for quality, individuality and flair.
Junckers is chain of custody certified according to both timber certification schemes PEFC and FSC. We cooperate actively with our local partners and international organisations to preserve our valuable forests for future generations.

More use, less waste, mindful forestry
Mindful forestry and production

Flemming Juncker, the founder of Junckers, was a forester. When he started the production of 2 strip floors in the 1930s, he tried to utilise the parts of the hardwood trees which were then only used as firewood. This resulted in a more profitable utilisation of the wood resources and thus gave the forest owners a better financial basis for replanting and maintaining their forests.

Through the better utilisation of the wood resources, Flemming Juncker contributed to making forestry viable, and this is still Junckers’ philosophy. In the regions where we source our wood, new trees are planted to such an extent that the total forest area grows each year. This and the fact that the existing forests are thriving is living proof that they are well managed.

Junckers’ manufacturing process uses 100% of the wood. By-products such as bark, chippings and sawdust are used to fuel the on-site power plant providing electrical power and steam for use in the production of our flooring in Koege. The actual amount of energy produced is more than is needed in the factory and we therefore supply the excess electricity to the Danish national grid.
As a natural living material, solid wooden floors create an ideal indoor climate. The room temperature will remain even due to the natural heat retention of wood and unlike carpeting and most laminated floors, static electricity from IT equipment, TV screens and the like will be minimised due to the non-conducting composition of real wood.

A breath of fresh air
Junckers floors clean up quickly and effectively, either by sweeping, vacuum cleaning or damp cleaning. With mould spores, dust mites and other allergens short of places to hide, the room will be both cleaner and healthier than with most other types of flooring. In addition to this, our solid floors are manufactured without the use of insecticides, such as pentachlorfenol (PCP), formaldehyde or laminating adhesives. It isn’t hard to see why Junckers floors are considered a healthy choice for everyone.
wooden floors
Grading classes

No two trees in the forest are the same. Neither are two cuts or two finished boards. Each plays its own lyrical tune of grains, knots and colour variations, composed by weather, seasons and forest wildlife - the very challenge and charm of working with wood. At Junckers you will find the wood graded into three classes, depending on the character.

**JUNCKERS WOOD CHARACTER OPTIONS**

Junckers can deliver most floors in a choice of three grades:

**CLASSIC**
A very even colour and uniform appearance

**HARMONY**
A natural appearance with more colour and grain variation

**VARIATION**
A rustic look with lots of graining and colour variation

Prefinished from the factory

Junckers floors are normally delivered prefinished with oil or lacquer and are ready for immediate use. Or you can choose a raw surface if you prefer to treat your floor yourself after installation.

**Oil**
Junckers oiled floors enhance the natural glow of the wood and provide a naturally soft, authentic surface that is both durable and easy to maintain.

**Silk matt lacquer**
Junckers silk matt lacquered floors enhance the glow of the wood and provide a strong and highly durable, easy-to-clean surface, suitable for the busy family or high-traffic areas.

**Ultramatt lacquer**
Junckers ultramatt lacquered floors combine a very natural matt appearance with the highly durable, easy-to-clean surface.

**Untreated**
The raw surface of the wood requires treatment with one of Junckers professional oils or varnishes before use. Our products are water-based, easy to use and gentle on the environment.
More use, less waste, mindful forestry.
The floor is the first piece of furniture in a room. It sets the basic atmosphere and influences all other design elements. Real quality and beauty in the floor will lift and enhance the entire space and with the Junckers floor collections you have the creative material to make it exceptional.

Junckers’ solid hardwood floors combine nature’s durable charm with perfect design freedom. Set out in three strong collections, the following pages are filled with an inspiring choice of first-class hardwoods, contemporary colours and multiple state-of-the-art finishes and styles, which you can combine at will.

The possible combinations are innumerable and if that’s not enough, our experienced technicians and designers will be ready to work with you on specific creative ideas. Irrespective of whether you go with a simple and Nordic style, something lavishly exotic, or you can’t resist one of our bold and bright colours, it will be just your floor. No copies.
OAK NATURAL PEARL
One Hawthorne, San Francisco
NORDIC ASH VARIATION

The Loft 25, New York

her kan der komme en beskrivelse af træet NORDIC ASH VARIATION
Straightforward authenticity, light and timeless comfort are keys to Junckers Original Collection of Nordic hardwoods, beech, ash and oak. These woods blend into classic interiors with natural ease, earned through generations of familiar service. Yet their understated, soft composure equally serves as a pleasing complement to the clean lines of modern architecture. Original Collection floors are classical and confident, enhancing any interior style with their unaffected naturalness.
ASH CLASSIC
Bang & Olufsen, Denmark
Ash has a very fine, light expression with a characteristic grain structure. Over time it attains a golden tone. Ash grows naturally in mixed wood forests.
SYLVAKET - Based on beech Junckers has created a product that has been vacuum stained to achieve a warm honey brown colour throughout the full thickness of the floor board.

Hurlingham Club, England
Along with ash and oak, beech is one of Europe’s widespread hardwood species spreading from Norway to Spain. The strength properties of the wood in combination with a uniform structure with yellowish white to reddish sapwood and red-brown grain pattern provides a light and classic floor.
OAK VARIATION
The One @ Furman, USA
Oak is extremely tough, durable and forgiving, making the wood exceptionally well suited to flooring. The structure is distinct in golden nuances and ages gracefully to a deeper glow.

Maple

Maple has a very uniform and gentle grain pattern and the natural light colour gives a very exclusive floor.

Width: 129 mm
Thickness: 22 mm
Indulge in a world of select woods, sumptuous dark tones and a through-and-through elegant feel. The warm and exotic colours will provide unflustered weight to any space and at the same time, simply carry the room. White walls and ceilings rise from the floor, and the sense of spaciousness is certainly heightened. Give in and enjoy – Luxury Collection floors are designed to fill your life with luxurious pleasure and style.
BLACK OAK HARMONY
Hotel, The Setai, 5th Avenue, New York
MIX OF BLACK OAK AND BEECH
BJ’s restaurant & Brewhouse, USA
Black Oak was originally a natural product of the forest - In former days black oak occurred when an oak trunk had rested a few hundred years in marshland. A natural process turned the wood black. Junckers has recreated the distinct, exclusive expression through a unique full thickness vacuum dyeing process.
Merbau
With its warm, nut brown expression and great strength, this is an exclusive floor that will enhance your space for life. The fresh wood is golden but quickly turns red and darker.
Width: 129 mm
Thickness: 14/22 mm

Black Oak
Black Oak flooring recreates the appearance of the much sought-after “bog oak” where ancient oaks preserved beneath peat bogs for hundreds of years emerged with a similar “through and through” black colour.
Width: 129 mm
Thickness: 14/22 mm
With its warm, nut brown expression and great strength, this is an exclusive floor that will enhance your space for life. The fresh wood is golden but quickly turns red and darker. Merbau is a common noble wood type in South East Asia.
SOUL+COLLECTION REAL SPICYPEPPER
Copenhagen Fashion Fair, Karen Simonsen
In a creative universe where every interior detail and element is carefully selected and serving a purpose, a specially designed floor will complete the individual design story and amplify the total experience of your living area or workspace. Delve into the possibilities of new finishes, reflective surfaces, pearl shines, enhanced textures, bright colours or subtle tones – the naturalness of solid wood remains ever present. Add a twist in classical surroundings or make a bold statement. But most of all: Give the floor a thought – give it an idea.
OAK GOLDEN PEARL

Pearl is achieved by adding a grey pearl wash with reflective qualities to the surface.

A Junckers floor gives you almost infinite design freedom. And once you have found the floor type that matches your ideas and style, you need to consider a number of details: Surface treatment, installation method, underfloor heating, sound and moisture insulation, and aftercare products. These are small, but vital details for achieving a floor that will enhance your space and add beauty to your everyday life, yet be out of your mind.

Design your floor

If you want help, simply ask us

We are dedicated to making every Junckers floor a success. Naturally, you can choose to plan and install your new floor without us, but you are also welcome to draw our experienced design consultants and technical experts into your project. The earlier, the better we can assist you in creating an exceptional result in your home or workspace.
Design  Our design and technical staff can guide you through the ranges and possibilities and help you design a floor that will enhance your space and fit into your style.

Planning  Experienced planning will ensure that the floor installation runs smoothly and well integrated within a new building or refurbishing project.

Specification  We can assist you in completing the full order documentation and specification, including laying instructions and costing.

Installation  Junckers floors are delivered punctually and installed according to plan using proprietary, fast and easy techniques. Fast installation will minimise inconvenience and business downtime.

Aftercare  Junckers professional care and cleaning products will bring you long-lasting use and satisfaction from your floors. We also remain available to assist you with any maintenance questions you might have at a later date.
Textured surface
Junckers’ unique, textured oak floors have an attractive, distinct surface that is produced via a special hard-brushing technique developed by Junckers. By removing the softer sapwood from the upper surface of the wood, the tougher and darker heartwood is raised, showing off the lively grain structure in a silky-soft surface.

Textured without colour
Brushed surface without colour is available as untreated, with a clear oil or lacquer on:

2 strip solid hardwood floors
• 14 mm and 22 mm Oak in Classic, Harmony and Variation
• 14 mm and 22 mm Ash in Classic, Harmony and Variation

Junckers Signature Colours
Perhaps you want to tell a specific design story, create an exact atmosphere, replicate a colour from other interior design elements - or you may need to observe specific brand guidelines in your floor design. If so, Junckers is open to work with you on creating the precise colour that bears your signature.
UNDERLINING LINES

Junckers ships decking
Wood is a living material that changes slightly with the seasons. During summer periods of high humidity, the floorboards will expand a little, just as they will contract during winter and dryer seasons, leaving small, natural gaps between them. This is the innate natural character of wood. However, with Junckers Ships Decking System, neoprene strips between the boards will absorb the movements, so that the floor will look the same all year round. More than that, the visible strips will create a robust, maritime feel and enhance each board for a spectacularly elegant and harmonious floor, similar to planks.

Junckers bevelled edged flooring
You can also create a more discreet plank impression without the distinct look of ships decking. Junckers bevelled flooring will create elegant, thin grooves between the floor boards, making the harmonious impression of long, elegant planks.
Clip System
QUICK, EASY AND SHALLOW IN ELEVATION
Junckers’ unique Clip System makes it possible to fit a solid floating floor directly onto a screeded or wooden base, with no need for battens. This laying method works perfectly with underfloor heating and is excellent for reducing impact sound into rooms below.

Glued floor
ROBUST SOUND AND FEEL
Junckers floors can be glued down to any base, including screed and wooden materials, using the unique and environmentally friendly Junckers Parquet Glue. Based on silicone, the glue also serves as a moisture membrane. A glued floor provides a very robust and solid feel, reducing the sound underfoot within the room plus it allows you to lay the floor in creative patterns.

Battens
STRONG INSTALLATION WITH SPACE BELOW
Our 22 mm floors are structurally strong. They can be nailed to battens and joists, to level out the floor. This gives plenty of space for pipes, cables, insulation, underfloor heating and other technical requirements to be placed underneath the floorboards.
Design freedom without pipes and heaters
Underfloor heating is an economical, luxurious and very elegant solution without visible pipes and heaters. It works to perfection under Junckers floors because, unlike tiles and stone, solid wood is naturally warm and pleasant, whether or not the heating is on. The result is not only a treat under bare feet, but also a comfortable, even room temperature. Water-based underfloor heating is generally suited for residential and commercial buildings, while electrical systems are ideal for minor renovations. The unique Junckers Clip System enables the Junckers floor to be floated over most modern underfloor heating systems, fitted within a screed subfloor. Alternatively, the underfloor heating system can be placed between battens or joists with the Junckers boards nailed over the top.

Installing the right underfloor heating
Water-based underfloor heating is generally suited for residential and commercial buildings, while electrical systems are ideal for smaller renovations. The unique Junckers Clip System enables a Junckers floor to be floated over most modern underfloor heating systems, fitted within a screed subfloor. Alternatively, the underfloor heating system can be placed between battens or joists with the Junckers boards nailed over the top.

Junckers accessories
To a perfect floor belongs a perfect finish. Junckers has a wide range of wooden accessories. So the sooner you call a Junckers consultant into your floor design, the more likely you are to end up with a perfect floor.
Junckers oils and lacquers
Using Junckers professional oils and lacquers, you can create the exact look and surface quality that you wish. Use a discreet finish to let the wood speak for itself or create a distinct look with a surprising colour or finish. Junckers oil and lacquer products are water-based, easy to use and produce a professional and durable result. And should you ever have a change of heart, our solid floors can be sanded again and again, allowing you to start all over with a fresh design idea.

Junckers daily care
A Junckers floor is easy to clean, thanks to the professional quality and finish. By sweeping or vacuum cleaning your floor, you will remove ordinary dust and dirt. If the floor is stained and dirty, damp cleaning will restore your floor to perfection. To keep your floors looking stunning and even to grow more beautiful, always use Junckers professional cleaning and care products, designed to nourish and treat the wood while you clean.
